(EXCLUDING VEAL CALVES)

INGREDIENTS

Grain products, plant protein products, molasses products, processed grain by-products, calcium carbonate, salt, pork fat (preserved with BHA), calcium phosphate, magnesium oxide, hydrolyzed yeast, sodium carboxymethylcellulose, vitamin E supplement, ferrous sulfate, *Yucca schidigera* extract, manganese proteinate, zinc proteinate, roughage products, selenium yeast, copper proteinate, niacin supplement, calcium pantothenate, cobalt proteinate, mineral oil, vitamin A supplement, menadione sodium bisulfite complex (source of vitamin K activity), vitamin D-3 supplement, riboflavin supplement, vegetable oil, vitamin B-12 supplement, pyridoxine hydrochloride, choline chloride, folic acid, thiamine mononitrate, ethylenediamine dihydroiodide, and biotin.

ACTIVE DRUG INGREDIENTS: Monensin, 22.5 g/ton

AVAILABLE IN 50 lb (22.69 kg) BAGS or BULK.

FEEDING DIRECTIONS

Each pound of United Equity Calf Grower MON22.5 contains 11.25 milligrams of Monensin. Hand feed at the rate of 1.25 to 8.8 pounds per 100 pounds of bodyweight to provide 0.14 to 1.0 milligram of Monensin per pound of bodyweight with a maximum of 200 milligrams Monensin per head per day depending on the severity of challenge. Provide a source of clean, fresh drinking water at all times.

- Same pellet benefits/components of our Calf Starter. Formulated specifically for a growing calf weaned and on full feed.
- Slowly switch from Calf Starter to Calf Grower. Continue feeding Calf Grower until the calf weighs 500-550 pounds.

Calcium, max	0.9 %
Phosphorus, min	0.3 %
Salt, min	0.1 %
Salt, max	0.6 %
Vitamin A, min	5,100 IU/lb.

WARNINGS

Do not use in calves to be processed for veal. A withdrawal period has not been established for this product in pre-ruminating calves. **CAUTION:** Do not allow horses or other equines access to formulations containing Monensin. Ingestion of Monensin by equines has been fatal. Do not feed undiluted. Monensin medicated cattle and goat feeds are safe for cattle and goats only. Consumption by unapproved species may result in toxic reactions. Do not exceed the levels of Monensin recommended in the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing. Feeding undiluted or mixing errors resulting in high concentrations of Monensin has been fatal to cattle and could be fatal to goats.

This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper. This product has been formulated specifically for beef cattle and is not intended for other species. **Caution:** Follow label directions. Feeding this feed containing added selenium at levels higher than recommended is not permitted.
